DEPARTMENT OF ARTIFICIAL INTELLIGENCE

UNIVERSITY OF MANAGEMENT

AND TECHNOLOGY

Lab Task 1:

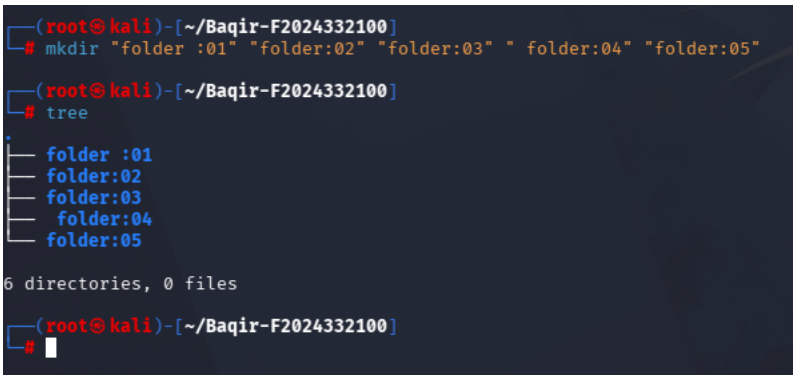

1:

To create the folder in the kali linux , I type the key

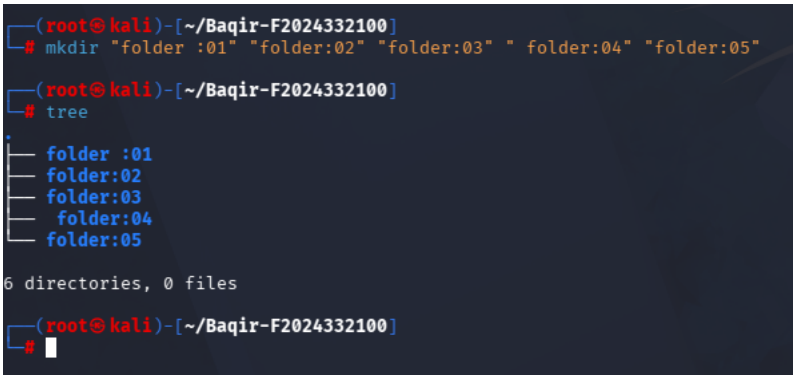

“mkdir Baqir-F2024332100” this create the folder
and if you want to chech the folder location the type the key “ls”
this shows the current location…….

2:

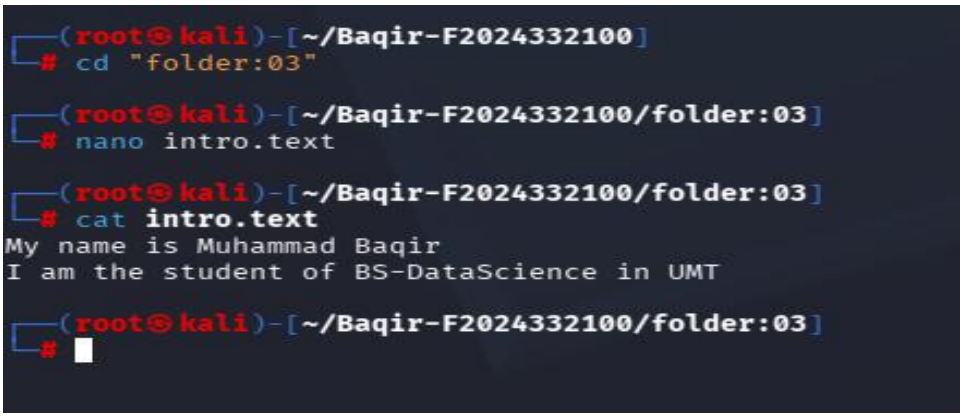

To add the folders in the current folder , I simply add the key
“mkdir “folder:01””folder:02””folder:03””folder:04””folder:05””
this create the folders as you show in the image ……

3:

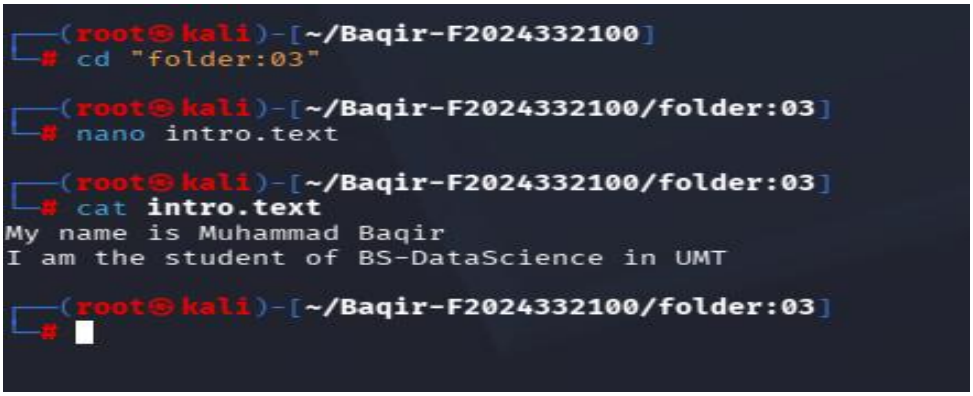

To show the recursive screen , I simply add the key “tree”

4:

I create the file using nano editor by writing this key “nano intro.text” in folder:03 and after open a new file I write introduction of myself and saved it by : ctrl +O
confirm by : enter
exit by : ctrl +x

5:

To display the current file data , I simply write the key
“cat intro.text “ this shows the data in the file in terminal ….
